Lung Cancer Screening: Benefits of Scanning for Early Detection

By: Christian Rolfo, MD, PhD, MBA, Dr.hc

Monday, March 27, 2023 • 6:15 - 7:15 pm ET (VIRTUAL)

This educational event is designed for primary care physicians and allied health professionals including but not limited to: Family Practice, Internal Medicine, OBGYN, Psychiatry, Addiction Medicine, and Pulmonology. At the conclusion of this activity participants should be able to:

- ◁ Describe lung cancer screening and its process;
- ◁ Identify patients who can benefit from the procedure; and
- ◁ Express the benefits of lung cancer screening within their patient population.

Primary care physicians are the first line of defense for patients who can benefit from this screening. Results show only 7.5% of those who could benefit are being screened and lives are already being saved through early diagnosis.

CME Credentialing Statement:

"This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of MedChi, The Maryland State Medical Society and Next Wave Group. MedChi is accredited by the ACCME to provide continuing medical education for physicians.

MedChi designates this online educational activity for a maximum of 1 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity."

**Christian Rolfo, MD, PhD,
MBA, Dr.hc.**

Dr. Rolfo is Professor of Medicine (Hematology and Medical Oncology) and Associate Director for Clinical Research in the Center for Thoracic Oncology at The Tisch Cancer Institute at Mount Sinai in New York City.
